LUMI™ DRUG SCAN

REAL-TIME DRUG ANALYSIS · RICH DATA INSIGHTS

Lumi Cloud

The trusted infrastructure foundation behind the Lumi platform and connecting every Lumi product.

Lumi Cloud securely manages spectral data from the frontline, machine-learning analysis, evidence records and operational insight while keeping organisations in control of access, location and governance.

SECURE INFRASTRUCTURE • INTELLIGENT ANALYSIS

01
Enterprise Onboarding

Security assessment
Risk and approval support
IT onboarding and MDM

02
Identify & Access

Enterprise SSO
MFA and access control
Organisation-managed users

03
Deployment & Training

e-Learning modules
In-person training
Consistent user onboarding

04
Online Support

In-app help site
How-to and knowledge base
Frontline troubleshooting

Organization controlled access to your data

End-to-end security

Enterprise grade security with end-to-end encryption, secure pairing, enterprise authentication and audit logging.

Chain of custody

Tamper-evident records link users, devices, time, location, spectra and results.

Data sovereignty

Regional hosting options support jurisdictional and organisational electronic chain of custody requirements.

ML drug analysis

Central ML models built from over 1 million scans turn spectral data into rapid and reliable results.

Connected platform

Enables Lumi Analysis, Lumi Lab, Lumi Central and Lumi Dashboard.

Scalable cloud service

Central updates, monitoring and secure deployment support growing operations.
