LUMI™ DRUG SCAN

REAL-TIME DRUG ANALYSIS · RICH DATA INSIGHTS

Lumi Lab

Rapid screening and analytical insights designed for your laboratory workflow.

Lumi Lab combines portable near-infrared analysis with a secure desktop workflow for case creation, sample screening, result review and consolidated reporting.

01 Connect

Pair to Lumi Nano device and calibrate

02 Record

Record case, sample and image

03 Analyze

Capture spectrum and result

04 Review

Complete case and export report

Built for forensic laboratory sample screening

Safer screening

Analyse suitable samples through transparent packaging, reducing unnecessary handling and preserving sample integrity.

Faster triage

Generate rapid screening results to help prioritise exhibits and focus confirmatory testing where it adds most value.

Traceable records

Retain case and sample details, analyst, instrument, calibration information, images, spectra and screening results.
