LUMI™ DRUG SCAN

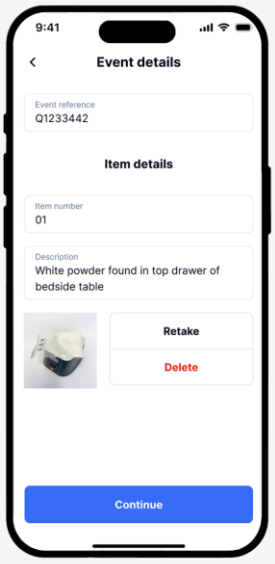

REAL-TIME DRUG ANALYSIS · RICH DATA INSIGHTS

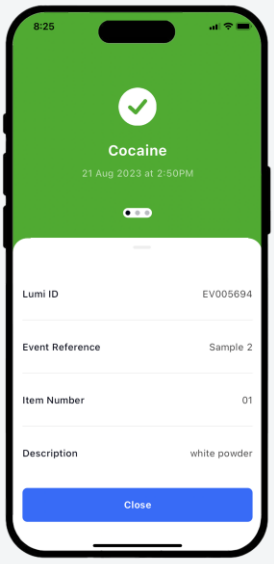

Lumi Analysis

Turn a frontline drug seizures into actionable, traceable result.

Lumi Analysis guides users through device connection, case and item data collection, sample scanning, result review and retention of the electronic analysis record.

iOS + Android
Mobile + Tablet

Single Sign On
Enterprise Authentication

Real-Time
Results in Seconds

Designed for frontline operational use

Guided analysis
Connect to Lumi Nano, review calibration and battery status, and initiate an item analysis from one mobile workflow.

Electronic evidence
Structured metadata captures event and item references, a photograph, user, date, time and location alongside the scan.

Clear results
Review the identified substance, sample details, photograph, location and the spectrum from the sample.

Controlled access
Enterprise deployment with organisation approved access, single sign on and multi-factor authentication.

Encrypted data
End-to-end data encryption with scan information and images retained with the analysis record.

Data sovereignty
Secure cloud deployment compatible with electronic chain of custody and data sovereignty requirements.
