LUMI™ DRUG SCAN

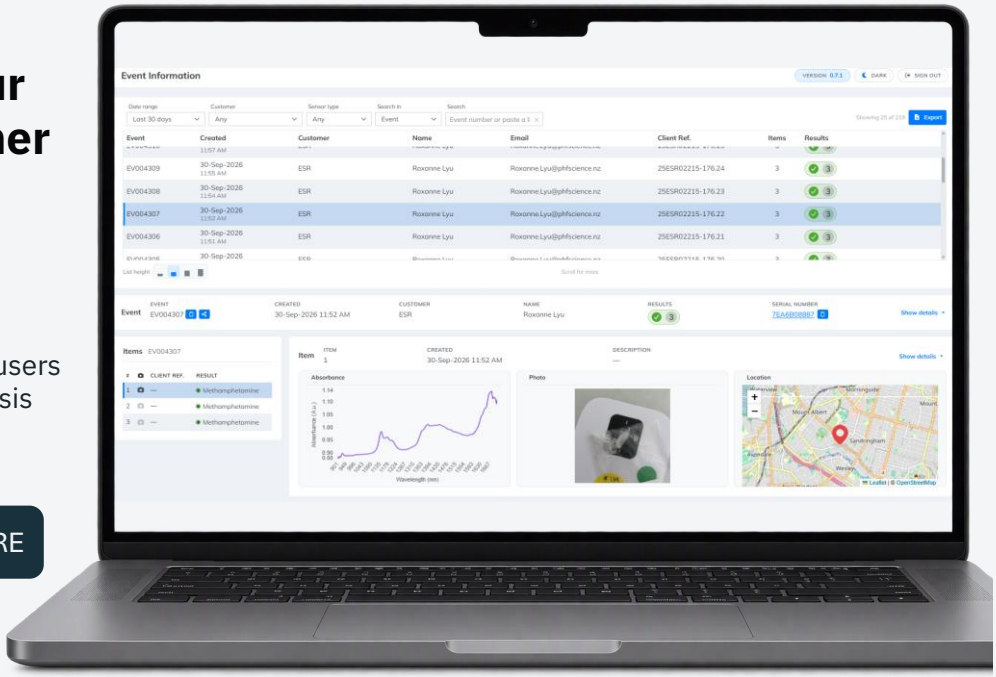

REAL-TIME DRUG ANALYSIS · RICH DATA INSIGHTS

Lumi Central

A case management application bringing your Lumi information together for organisation-wide activity management.

Lumi Central is a web-based case management application for authorised users to review accessible cases and the analysis activity associated with each item.

CONNECTED • SEARCHABLE • SECURE

A centralized view of your organization's Lumi activity

Cases and items

Manage cases in one secure workspace, bringing samples, analysis results and supporting information together.

Traceability

Maintain a clear, auditable history of analytical activity to support chain of custody and decision-making.

Built to scale

Support deployments from individual teams through to multi-site and organisation-wide Lumi operations.

Searchable metadata

Quickly find and review previous cases, samples and analytical results without searching across disconnected systems.

Controlled access

Enterprise deployment with organisation approved access, single sign on and multi-factor authentication.

Report retrieval

Retrieve case information and regenerate a report when the original operator is unavailable.
